DETAILED ACTION

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and system for ensuring the integrity and authenticity of broadcasted communications. Independent claims 1 and 17 each recite the uniquely distinct features of "obtaining a data block that is scheduled for transmission in a next frame; wherein the next frame includes segment groups; wherein each segment group includes a number (n) of data blocks; wherein each of the data block includes a plurality of packets; computing a set of hash keys using the secret key (Sn) and the count; selecting a hash key (Si) that is associated with the data block, wherein the selected hash key corresponds to one of the set of hash keys; computing a keyed-hash message authentication code (HMAC) value for the next frame using the selected hash key (Si); and assembling the next frame such that the data block and the HMAC value appear before the hash key in the frame transmission". Independent claims 11 and 20 each recite the uniquely distinct features of "retrieving another hash key (Si) and an keyed-hash message authentication code (HMAC) value from the frame; verifying the other hash key (Si) that is obtained from a previous frame; verifying the HMAC value with the other hash key (Si); computing a hash key using a count and a secret key (Si) that is known by both the server and the client device, wherein the count corresponds to a time stamp; discarding the frame when at least one of the other hash key (Si) and the HMAC

value fail verification; and accepting the frame when the other hash key (Si) and the HMAC value are successfully verified”.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
